

# Be a cyber-safe owl!

## Who am I ?

Riddles are a fun way to learn new things and consolidate your existing knowledge in a given area.

Here are four riddles we've created for you. Can you find the answers to each one? On the next page, we invite you to create six new riddles using cybersecurity vocabulary and present them to the other students in your class.

1

I am a secret you must never share. I am a key that unlocks your accounts and apps. I must be unique and difficult to guess.

Who am I?

2

I'm an invisible wall around your computer or phone. I block intruders and dangers that try to enter or exit without permission. I'm here to protect your network.

Who am I?

3

I'm like a bad gift you sometimes receive in an email. I ask you to click on a link or provide information, but it's a trap! My goal is to steal your login details or data.

Who am I?

4

I'm a small piece of malware. I can hide in files and make your device very slow or even crash. I can infect other computers if I spread.
